Education

KIET Group of Institutions

B.Tech. in Electronics and Communication Engineering (ECE), CGPA: 8.5

Ghaziabad, India

2024 – 2028

Experience

Frontend Developer — ERP Eduverse

June 2026 – Present

India

- Developing enterprise-grade ERP interfaces using React, TypeScript, TanStack Router, TanStack Query, Ant Design, and Tailwind CSS.
- Building scalable UI components and data-driven workflows using OpenAPI, REST APIs, Zustand, Vite, and modern frontend engineering practices.

Full Stack Developer Intern — Team ERP

Jan. 2026 – May 2026

India

- Developed responsive and production-ready interfaces for the KIET and Epoque websites using React, Next.js, JavaScript, and Bootstrap.
- Built reusable UI components, integrated APIs, and collaborated with design and backend teams to deliver accessible web experiences.

Projects

ERP Eduverse | React, TypeScript, TanStack, Ant Design

[Live](#)

- Contributed to a production ERP platform across Academics, Curriculum, Student Registration, HR, Admissions, Support, and Reporting modules.
- Built features including CO-PO mapping, drag-and-drop workflows, dynamic data tables, column controls, and Excel/PDF exports.

Epoque | React, Next.js, Bootstrap, UI/UX

[Live](#)

- Improved the frontend UI theme, forms, layouts, and visual consistency of the Epoque website.
- Designed and integrated reusable UI components, refining existing interfaces for a responsive, polished user experience.

KIET Website | Frontend Development, UI Components, Responsive Design

[Live](#)

- Implemented new pages and reusable frontend components across the KIET website.
- Maintained UI consistency and improved responsive behavior across different sections.

BrightSync-HR | TanStack Start, React, TypeScript, Ant Design, Tailwind CSS

[Live](#)

- Built a full-stack role-based task management app for HR managers and employees to assign and track tasks.
- Implemented an interactive calendar with task states, automatic overdue detection, and duplicate-task prevention using TanStack Router and Axios.

PeerPulse-Chatapp | React, Vite, Tailwind CSS, PeerJS

[Live](#)

- Built a serverless peer-to-peer chat app using WebRTC and PeerJS for direct browser-to-browser messaging.
- Implemented local contact management and an animated, responsive light/dark themed interface with Tailwind CSS.

MedSync-HMS | AngularJS, Bootstrap, JSON Server

[Live](#)

- Developed a multi-role hospital management system with tailored dashboards for Doctor, Patient, and Receptionist workflows.
- Implemented appointment scheduling, booking/approval workflows, and prescription management using a mock REST API.

Skills

Languages — JavaScript, TypeScript, Python, HTML5, CSS3

Frontend — React.js, Next.js, TanStack Router, TanStack Start, TanStack Virtual, Tailwind CSS, Bootstrap, Ant Design, PeerJS

Backend & APIs — Django, REST APIs, Axios, OpenAPI, JSON Server, TanStack Query, Zustand

Cloud & Tools — Cloudflare, Git, GitHub, Bun, Vite, ESLint, Biome, Prettier, Husky
